CA2029-8

- **Government compatible CAC technology ensures prime security for your mobile devices.** DoD CAC, PIV or our PSSI memory cards can be used with or without an administrator-programmed pin for added security. With programmable permissions settings, the CA can be configured to give user-specific access to any combination of drawers.
- **Advanced networking system updates E-Tools as they charge.** With the CA's network switch and CAT6 wiring, even remote administrators can easily install security patches, software updates, and more as optional AC power in each drawer keeps devices charged and ready to go.
- **New Quiet-Cool Technology makes the CA easy on the ears and the environment.** Advanced heat sensors and dedicated fans cool only the drawers that need cooling. With the CA's programmable thermostat and localized temperature control, fan speed increases only when necessary —giving your workspace more peace and quiet.

Optional Features

- AC Power
- CAT6 Wiring
- Network Switch
- Apple® iPad® Sync Kit
- KVM Switch Kit
- Fiberoptic Switch Kit
- Mobility Kit

Specifications

Model #	Description	Width	Height	Depth
